BUSINESS REVIEW

The global economy experienced a tough time in the first half of 2020 when the coronavirus disease 2019 (COVID-19) spread across the world. Coupled with the China-US trade tension, the world economy apparently underwent a downturn. To cope with the epidemic outbreak, Beijing Tong Ren Tang Chinese Medicine Company Limited (the “Company”) and its subsidiaries (collectively the “Group”, “we” or “us”) have established a “global coronavirus prevention and treatment expert team”, through which high-quality Traditional Chinese medicine (“TCM”) resources were integrated, and our global presence covering more than 20 countries and regions was utilized. TCM Masters and TCM experts at home and abroad presented their tailor-made “one country one strategy” TCM epidemic prevention solutions to overseas, jointly contributing their wisdom and strength to the global health community.

Under various economic uncertainties, market consumption was weak. A series of precautionary and control measures were implemented in China, Hong Kong, Macao and other countries in the world, which significantly affected the Group’s businesses in China, Hong Kong and Macao. For the six months ended 30 June 2020 (the “Period”), the Group recorded a revenue of HK\$567.4 million (2019: HK\$822.5 million), representing a decrease of 31.0% over the same period of last year, and profit attributable to owners of the Company of HK\$226.6 million (2019: HK\$358.6 million), representing a decrease of 36.8% over the same period of last year.

Market Exploration

Being committed to the corporate spirit of “Nurturing kindness and virtue, Preserving tranquility and wellness”, the Group has established a “Tong Ren Tang global coronavirus prevention and treatment expert team” for the epidemic. The team has publicized 77 sets of “Fuzheng Biwen Decoction” formula to 35 countries and regions across the world at the end of June 2020 with an aim to provide a Tong Ren Tang solution for people to deal with the control of global epidemic. The “Fuzheng Biwen Decoction” was jointly prescribed by 20 overseas TCM experts of Tong Ren Tang under the lead of Mr. Tang Zuxuan, a famous TCM Master, in reliance upon the neural network modelling technology and the intelligent big data analysis framework. Given the feature of one specific policy for one country or one region, the formula has safeguarded the health of the people in countries and regions suffering from the widespread epidemic. Meanwhile, the Group initiated the “Care for others and fights the epidemic” campaign, under which it urgently mobilized its retail outlets in 20 countries and regions to set up “epidemic prevention medicine counters” and provide services such as free online medical consultations and mailing of medicine, and donated various types of epidemic prevention products to mainland China, Hong Kong and overseas. The Group demonstrated the philanthropic spirit of a Chinese brand name by delivering TCM-based anti-epidemic services in an efficient way.

New advertisement contents were created for the key products of the Group, namely Angong Niu Huang Wan and Sporoderm-broken Ganoderma Lucidum Spores Powder Capsules (“GLSPC”). For Angong Niu Huang Wan, its unparalleled status as a royal medicine was accentuated by the unique functions, two natural precious ingredients (natural Bovis Calculus and Moschus) and efficacy as an emergency medicine. “Red” spores powder of Ganoderma lucidum is the only ingredient of GLSPC with high sporoderm-broken rate and its immunity enhancement efficacy was highlighted. Meanwhile, the Group introduced the “one-product-one-policy” retail business promotion strategy in its core market in Hong Kong and strengthened promotion in a comprehensive manner to enhance the market competitiveness of its products and stimulate sales performance.

The Group continued to disseminate healthcare information and maintain the “TCM Healthy Lifestyle Column” by means of newspaper, Facebook, WeChat platform, its official website, store brochures, etc.. It also organized online health seminars to deliver health information and promote the Tong Ren Tang brand and TCM culture to the public.

Given the evolving global consumption pattern, the Group launched the Beijing Tong Ren Tang online shopping mall on its official website in order to explore more diversified and up-to-date sales channels with modern technologies, provide customers with seamless online and offline shopping experience, and capitalize on new business opportunities.

Production, Research and Development

During the Period, the Group continued to focus on its core businesses and enrich its product mix, and successfully completed the proprietary Chinese medicine registration for one new product in Hong Kong.

We continued to ride on the development trend of the comprehensive healthcare industry and started developing new products to satisfy the extensive market demand for products which can adjust body functions and prevent illness. Apart from new product research and development, the Group has been actively focusing on the scientific research of our key products, products upgrade as well as facilitating product development in the future. In order to achieve better results in scientific researches, we continued to conduct researches on safety, mechanism and other aspects of our key products with internationally renowned institutions. It is expected that the results of such scientific researches will provide a reliable basis with scientific support that helps our products enter the mainstream overseas market.

MANAGEMENT DISCUSSION AND ANALYSIS

To provide sufficient protection for the dominant products of Tong Ren Tang, apart from enhancing the development of independent intellectual property rights, we also closely cooperated with well-known domestic enterprises in anti-counterfeiting technology upgrade projects to avoid market impacts caused by counterfeit products, protect consumers' rights and interests, and further strengthen consumers' confidence in the Tong Ren Tang brand.

Future Prospects

TCM plays an increasingly significant role in the fight against the global epidemic outbreak and Tong Ren Tang, being a TCM company widely known by the world, makes more important contributions in the regard. In the future, when the epidemic may become persistent, TCM will turn to a new healthcare option of more and more people around the world.

Prevention comes before cure and should be our primary focus. Due to the global epidemic outbreak, health has become the common topic for human development and the idea of comprehensive healthcare has grown more popular. There is a promising future for both Tong Ren Tang and the TCM industry. With its determination to pursue a reform, the Group will take the opportunity to push forward its structural upgrade and innovative development. Through the reform of internal organizational structure and the improvement of regional management, the Group is able to master its intercontinental management system and carry out business procedure improvement and product upgrade with the support of internet technology by integrating high-quality resources and strengths. As TCM contributes remarkable momentum to the formation of a global community of shared health, Tong Ren Tang remains steadfast in its development of overseas markets. The Group will also continue to push forward its development in key strategic areas, such as Guangdong-Hong Kong-Macao Greater Bay Area and Hainan Free Trade Port, expand market deployment, optimize functional structures and strive to become a Chinese health solutions contributor in the world.

As the global outbreak of COVID-19 is far from stable given the still increasing number of confirmed cases around the world and the duration of the epidemic remains unknown, we expect that the Group's business will still be subject to impact to a certain extent in the second half of 2020. Despite the currently challenging business environment, the management of the Company have decisively taken various measures to deal with the existing predicament and focus on the target of improving profitability as soon as possible.
